

G.O.A.T'ed the Hackathon - Sponsors' kit

Who Are We? What is G.O.A.T'ed?

G.O.A.T'ed (Geek Of All Trades) is a two-day tech bootcamp/learnathon created by a team of independent 18-year-old organizers and members of Hack Club, a global community of teenage makers and builders.

This August, we're bringing together 40 participants in New York City to learn 7 useful technologies and tools by building hands-on projects and collaborating with peers to become Geeks Of All Trades (G.O.A.T).

We are currently budgeting for 40 participants and plan to expand our capacity as additional funding is secured.

What Will Participants Learn?

Throughout the weekend, participants will learn the following skills by building fun projects from scratch:

- Web development
- Game development
- Building a Python app
- Hardware/Electronics Design & Assembly (EDA)
- Building a Web Operating System
- Building a Programming Language
- Git & GitHub
- Visual Studio Code

By the end of the event, every participant will have built a capstone and will walk away with new skills to build their own projects.

Why Sponsor G.O.A.T'ed?

Your sponsorship will directly help:

- Raise the next generation of builders, tinkerers, creators, and entrepreneurs in STEM
- Introduce over 40 teenagers and youth to programming, hardware, and engineering.
- Remove financial barriers to hands-on STEM education
- Create an environment where students build real projects and become their own engineers.

Please take some time to look through our [website](#), [schedule](#), and [budget/budget needs](#). [Financial donations](#) can be made through HCB, our fiscal sponsor.

As a sponsor, you'll also receive recognition on our website and throughout event materials.

How To Sponsor

Financial support **isn't** the only way to contribute. Sponsors can provide one or more of the following event needs:

- A secure venue
- Meals and refreshments
- Prizes - custom/choice merch or prizes for outstanding projects and participants
- Financial contributions to purchase any of the above.

To contribute: [Donate financially](#) through HCB or [reach out](#) to us via email.

Transparency

Our event budget, fundraising progress, and spending are [publicly available](#) through [HCB](#) so sponsors can see exactly how contributions are being used. We have also made our program schedule public:

Program schedule

While workshop durations may seem short, please note that we've held these workshops in the past under similar time constraints. Participants will gain enough knowledge and will build working sites/apps/prototypes within the duration.

Git/GitHub and VS Code are not listed as separate workshops because participants will learn to use them during various workshops. We'll have participants follow short onboarding tutorials to set up GitHub and VS Code before the 21st to reduce debugging delays.

This schedule may continue to be refined. Specific details for each listed activity (such as the games/icebreakers that will be played and the ways each workshop will be run) are in a separate doc for the organizers.

Day 1 – Friday 21st August – 9:00 am–7:00 pm

9:00 am – 9:45 am Welcome, kick-off & high-energy ice-breakers to get teenagers socializing.

9:45 am – 11:45 am - Workshop #1 - Web development - make your first website. After learning the basics, they'll have template code and Bootstrap to work with.

Everyone gather - town Hall setting - light talks, and fun activities till **12.20 pm**

12:20 pm – 2:20 pm - Workshop #2 - Game development/Build a programming language - Participants will pick one of the two. Game developers will build their first platformer game with Godot. Programming language developers will invent a goofy programming language.

Teens get lunch & settle down to eat, light interactive/informal talk on the future of tech and AI - by guest speaker or mentor.

3:00 pm – 5:00 pm - Workshop #3 - Learn Python and build a Python Web App from scratch.

5:00 pm – 5:40 pm - Everyone gathers; social games to chill out;

5:40 pm - 6:40 pm - teens form groups of three and brainstorm ideas for their capstone project. Groups will discuss their project with a mentor who will help them plan out integration/execution. We will provide a list of project ideas that groups can consider working on to integrate one or more of the skills learned. Teens can also suggest their own ideas.

6:45 pm - Announcements for tomorrow, sign off / goodbyes

Day 2 – Saturday 22nd August – 9:00 am–7:00 pm

9:00 am – 9:45 am - Welcome, Social icebreaker, participants socialize.

9:45 am - 11:00 am Workshop #4 - Hardware Design and Electronics - Participants will design circuit boards for a [macropad](#) using KiCad, and everyone will assemble as a group.

11:30 – 1:00 pm - Workshop #5 - Make a WebOS together (**short**)

1:00 pm - 1:40 pm - Town hall - a few participants share what they've learned, capstone announcements, guidelines, and kick-off.

1:50 pm – 5:30 pm (3 hrs, 40 mins) - Revise plans slightly if needed and build capstone. Mentors are there to guide groups and help if they get stuck. Capstones don't need to be large hackathon projects. Should be any innovative ideas they have during the program.

Dinner by 4:00 pm during capstone build.

5:30 pm – 6:15 pm - Pitching, Show-off & Judging - science fair style. Judges go around tables, and teenagers can visit tables to see what their teammates built.

Participants tidy up tables; judges decide.

6:25 pm - Announce winners, share prizes, sign off announcements, and goodbyes.

Budget

We are budgeting for 40 participants and approximately 15 mentors and volunteers. We would love to increase our capacity if we receive additional funding.

Current Event Needs

- A secure venue (hosts 40, wifi, electricity)
- Meals - (Friday and Saturday - Lunch and Dinner)
- Snacks (Friday + Saturday)
- Prizes (Crowd favorite, most ambitious, most creative)
- ID Badges and event logistics, additional merch is funded

No high-carb for lunch. Confirm no allergy in registration forms and before serving. Vegetarian options for each meal.

ITEM	Current plan	BUDGET ESTIMATE
Friday Lunch	Pita Yeero Mediterranean-Make Your Own Bowl	\$430
Friday dinner	Pizza (Regular and Vegetarian) - 15-19 pies	\$370
Saturday Lunch	Poulette, croissants situation package	\$470
Saturday Dinner	Black Tap Burger+Salad (Regular and Vegetarian)	\$430
Snacks	Soda (70 pcs, \$38), Granola bars (2 packs of 45 - \$30), Water (160pcs - \$20) All from Costco Wholesale	\$90
Prizes for winners (Crowd favorite, most ambitious, most creative)	RP2040 devboard, Headphones/earbuds, Tamagotchis	\$200
ID Badges and holder	Holders from Amazon are the lowest-priced option, print out names.	\$35

Venue	Civic Hall(free)/Cornell Tech	
-------	-------------------------------	--

Total financial costs (excluding venue): ~ \$2000

Other needs:

Recall that financial sponsorship is not the only way to sponsor this event. You can sponsor this event with a **secure venue**, with **food arrangements**, with **custom or choice products as prizes for the outstanding teens/projects**, or with **funds** to cater for any of the above.

Financial Donations can be made through HCB, our fiscal sponsor.

Please reach out for other contributions, contact@goatedlearnathon.com or fummyoshe@gmail.com

Mentors' Kit

Be a part of 12-15 mentors supporting participants throughout the weekend by helping them debug, brainstorm ideas, or overcome technical roadblocks.

Whether you're an experienced engineer or an enthusiastic builder, we'd love to have you.

Why Mentor?

- Inspire the next generation of builders and tinkerers.
- Meet talented and motivated teenagers.
- Give back to the community.
- Help students build projects they're proud of.

Reach out fummyoshe@gmail.com or contact@goatedlearnathon.com or fill out the form on [our site](#)
